PREFACE

THIS is an entirely new edition of a standard work; it is quite original in style and type, and advantage has been taken of the resetting to adopt many improvements that have been under the consideration of the present editor for the last thirty years.

With thorough revision and copious addition the old book has been brought up to date and all that was good in it retained. It was planned as a dictionary in one volume for ready reference and instant answer, and has lost nothing in the comprehensiveness of its matter and the clearness of its definitions.

Every word and hyphened word has an entry to itself in the vocabulary and none of them has to be sought for among a bewildering crowd in the body of the definition.

A new departure which helps in easy reference is the order of its items, the part of speech being placed next to the catchword because it is known to the reader or hearer by the phrase in which the word has been met with, and on it depends the pronunciation. In this the word is spelt phonetically, or as it would be written according to sound; and, although there have been difficulties regarding the niceties of pronunciation in particular cases, it will be found that the results are as near to accuracy as any combination from our present alphabet can be expected to produce.

Pronunciation depends largely on accent, which is the laying of stress on a certain syllable of the word. All English words, except the monosyllables, have an accented syllable; and many of the polysyllables have not only a primary accent but a secondary one which is also italicized herein when the stress requires it; the general tendency of the language being to place the accent on the first syllable of dissyllables and on the last but one of polysyllables, though the exceptions are numerous.

A dictionary is as frequently referred to for the spelling of a word as for its meaning ; and, for that reason, as many derivatives have been given as the space would permit, including the inflexions of the verbs, which is another new feature. In the spelling of the verbs the form " ize " has been retained—as in the great Oxford Dictionary—whenever it is correct, for it came into the language from the Greek " izo " through the Latin " izare " from which the French got their " iser," and the " s " shows that the verb was imported ready made, while the " z " shows that it was made in Britain.

In defining the animals and plants the vague generalities that usually do duty for definitions have been replaced by the systematic names which exactly define the word. These are indispensable, not only for foreigners who consult English dictionaries in learning our language, but for those who speak English overseas, and even in England where the popular names differ and frequently interchange in different districts, while the systematic names are—or should be—the same everywhere.

In a number of instances phrases and idioms are included in connection with the principal word composing them, and there are definitions of the verbs and other parts of speech as affected by modifying adverbs and prepositions. Many of the words in the definitions are approximately synonymous, but, like most synonyms, they differ slightly in meaning and vary according to the occasion on which they are used where the defined word would not be appropriate.

The origin of many words is unknown. Etymologists trace them back to the first time they meet with them, but do not know where the root really originated, and search can only end in surmise. For this reason the derivation given here is the word's immediate source ; and when the word has been English all along its Old English form is marked A.S., to save confusion among initials.

In addition to the vocabulary the volume contains a trustworthy guide to the correct pronunciation of the French, German, Italian, Spanish, Dutch and Welsh languages, in which the sounds are shown by the new international signs that have done so much to simplify a very difficult matter.

This is followed by a comprehensive group of foreign and other words and phrases in occasional use which cannot very well be included in an

English vocabulary. Also we find room for a large selection of abbreviations now current or met with in literature. Two lists follow, those of prefixes and suffixes, showing at a glance the beginnings and endings by which the oldest part of a word is modified into different meanings.

The lists of Greek and Latin and Scripture names have been retained, and that of Geographical names has been extended and followed by the old topographical terms descriptive of physical features which appear in so many of our place names. Next to these we have the customary pronunciations of personal names ; and then a list of sporting and other terms applied to numbers and quantities.

An interesting addition is a summary of the international language Esperanto, devised by Dr. L. L. Zamenhof in 1887 ; and in the last group are the usual ceremonious forms of address, a catalogue of the coins and paper money of the British Empire, a conspectus of the metric system, and a collection of signs and symbols.

THE ENGLISH LANGUAGE

THE English Language, which is now spoken over a large portion of the globe by upwards of 180 millions of its inhabitants, originated from one brought into the country by various tribes from the north of Germany and Denmark who settled here in the fifth and sixth centuries of the Christian era. The principal of these were the Jutes, the Saxons and the Engle—a word frequently spelt Ængles, denoting that the E is long. Engles became Latinized as Angli, which was translated into Angles, and is still used in Anglo-Saxon—a compound word which was not introduced until centuries afterwards, and is used herein as a synonym for Old English. These tribes gradually drove the greater number of the natives, who were of Celtic race, westward and into the mountainous parts of Wales, where their descendants are now located, and where their language in a modern form is still spoken. The settlers from across the North Sea had not been here many years before the southern part of Britain was called, after the chief tribe, Engleland or England, and the language they spoke, formed from the amalgamation of their several dialects, was called English, as King Alfred always called it, though he was a West Saxon.

The majority of the words in the language as now spoken are of English origin. A considerable proportion of the others were taken from the Latin (the language of the Romans), but many of these, formerly supposed to come direct from that language, are really Old French, introduced by the Normans, or by the men who took part in the French wars under the later Plantagenets. The rest are from the Celtic, Dutch, Scandinavian, and other tongues, along with the Greek which supplies many of the scientific terms.

There are three periods in the history of the English language : (i) The Old English (Anglo-Saxon) from 450 to 1150, when the words were inflected

in all four of its dialects, the West Saxon, the Northumbrian, the Mercian, and the Kentish (the speech of the Jutes); the Northumbrian being the first to modify its inflections and gradually abandon them under the influence of the Danish invaders, whose language, though closely allied, was different in its grammar; (ii) The Middle English from 1150 to 1500, when many of the inflections disappear or become confused and Norman French began to yield to it; (iii) The Modern English which, during the sixteenth century, began to assume the form in which we now find it.

NOTES ON GRAMMAR

THE words in our language are classified as Parts of Speech, and, independently of the articles *a*, *an*, and *the*, consist of NOUN, ADJECTIVE, PRONOUN, VERB, ADVERB, PREPOSITION, CONJUNCTION, or INTERJECTION; and each word in the Dictionary is referred to one or other of these categories according to its function, thus :—

n.	representing	noun.	*ad.*	representing	adverb.
a.	,,	adjective.	*prep.*	,,	preposition.
pron.	,,	pronoun.	*conj.*	,,	conjunction.
v.	,,	verb.	*int.*	,,	interjection.

As the first four parts of speech vary in inflection or otherwise, these changes are indicated thus :—

n.pl.	representing	noun plural.	*v.imp.*	representing	verb impersonal.
v.i.	,,	verb intransitive.	*p.*	,,	past.
v.t.	,,	verb transitive.	*ppr.*	,,	present participle.

Each of the many thousand words of which our language is composed belongs to one or other of the above Parts of Speech, and the same word may belong to this or that division according to its function in a sentence. Thus, a word is a NOUN when it names a thing, whether that be a substance or an abstraction. An ADJECTIVE is a word "added to" a noun to qualify it in some way, and in general amplify its meaning and limit its application. A PRONOUN is a word used in place of a noun, to avoid its

repetition, as well as to indicate certain rhetorical relations or logical connections. The VERB is "the word" of a sentence, and that which makes the assertion, as well as asks a question or expresses a command, and is here called transitive when it is active, and intransitive (*i.e.* neither active nor passive) when it is not. An ADVERB is a word properly appended to a verb to express some modifying circumstance of place, time, manner or cause regarding it, but is also used to qualify attributive words like adjectives as well as verbs. The PREPOSITION is a word placed before a noun or pronoun to show its relation to some other word in the sentence. The CONJUNCTION is a word used to join together sentences or clauses of sentences, and to indicate the relation in which these stand to each other. The INTERJECTION is an abrupt exclamation "thrown between" the words of a sentence to express some related emotion on the part of the speaker. The student will find many words which are of different parts of speech, and verbs which are both transitive and intransitive, according to the senses in which they are used: but these are all clearly distinguished, and the definitions given accordingly.

In spelling, it is a general rule in English that when words which end with the silent *e* receive an augment beginning with a vowel, the *e* is omitted, as *give, giving*; *sense, sensible*; *cure, curable*; *fame, famous.* Before *fy* and *ty* the *e* is changed *into i*, as *pure, purity, purify*; *active, activity.* When the silent *e* is preceded by *c* or *g* soft, it is usually retained before *able* and *ous*, as *peace, peaceable*; *courage, courageous.* The *e* is retained before *full, less, ly, ment, ness, some, ty*, as *peaceful, nameless, wisely, excitement, whiteness, wholesome, safety.* It is also an established rule that words which end with the vowel *e*, with the effect of lengthening the sound of a preceding vowel (as in *file, write, endure*), should drop the *e* on receiving a termination and becoming a derivative, if that termination began with a vowel (as *er, ed, ing, ance*). Thus file—*filer, filing*, not *fileer*; endure—*enduring, endurance*, not *endureance.*

In cases where the *e* affects the sound of a preceding consonant, it forms an exception, as in a word with a soft *g*, or where, in juxtaposition with another *e*, it forms one long vowel: thus, singe, singeing, see, seeing. Monosyllabic words ending in a single consonant, not preceded by a long vowel, and words of more than one syllable, ending in a single accented

consonant, and, of course, not preceded by a long vowel, *double the final consonant* in all the derivatives which are formed by a termination beginning with a vowel, as fit, fitted, fitteth, fitting; bar, barred, barring; abet, abetted; compel, compelled.

But for this doubling of the final consonant, the vowel in the accented syllable of the primitive word (as the *e* in *abet*) would be wrongly pronounced in the derivative (abetted, etc.), namely, with its long sound—fited, bared, abeted. Hence the reason why verbs, having the long sound of a vowel, do not double the last consonant, as *feared, defiled, bloated.*

Words ending in a single consonant, but not having the accent on the last syllable, do not double the final consonant in derivatives, as limit, limited; civil, civility; enter, entered; yet there still remain a small number which do, such as leveller, traveller, rivalling, worshipper. A word ending in *ll* usually drops one *l* on becoming part of a compound word, as *all, always*; *fill, fulfil*; *full, fruitful*; *till, until.* But there are some exceptions to this rule, as *recall, refill, uphill.* Words ending in *y*, preceded by a consonant, change the *y* into *i* on receiving an augment, as *holy, holier*; *happy, happiness*; *pity, pitied*; but before *ing* and *ish* the *y* is retained, as *flying* and *babyish.* When the *y* is preceded by a vowel it is retained, as *boy, boyish*; *joy, joyful*; but to this there are exceptions, such as *gaiety* and *paid.*

PRONUNCIATION

"THE pronunciation of the English language, like that of all living languages," said Dr. Worcester, "is in a great measure arbitrary. It is exposed to the caprices of fashion and taste. It is liable to change from one age to another; and it varies more or less, not only in the different and distantly separated countries in which it is spoken, but also in the different divisions and districts of the same country. No two speakers, though inhabitants of the same place, would be likely to agree in the pronunciation of all its words. The standard of pronunciation is not the authority of any dictionary; but it is the present usage of literary and well-bred society. The question may be asked, Where is this standard

to be sought, or this usage to be ascertained ? To this it may be answered, that London is the great metropolis of English literature, and that it has an incomparably greater influence than any other city in giving law, in relation to style and pronunciation, to the many millions who write and speak the language." Hence it is that the English naturally refer to the usage of the best society in London as their safest standard ; although, even here, in many words, there is no certain uniformity. Discrepancies are found to exist, and it only remains for the lexicographer to endeavour to reconcile those discrepancies according to the best of his judgment.

Letters are the elements into which the words of any language may be analysed, and they form the necessary alphabet of that language. Words are the due combination of letters and syllables, and form distinct and articulate sounds for conveying our ideas to one another ; and a good dictionary may be considered as the best and most important medium for attaining a correct knowledge of the principles and practice of good pronunciation.

Some acquaintance with the general properties of vowels and consonants may be necessary to the right understanding of this matter. The distinction between them is great. A vowel sound may be continued at leisure, or it may be terminated either by discontinuing the vocal effort, in which case it is not articulated by any consonant, as in pronouncing the vowel *o*, or by changing the conformation of the mouth or relative position of the organs of speech, so that the vowel sound is lost by articulation, as in pronouncing the syllable *on*.

In pronouncing consonants there are five distinguishable positions of these organs. The first is the application of the lips to each other, so as to close the mouth. Thus are formed the consonants *p*, *b*, and *m*. In the second position, the under lip is applied to the fore teeth of the upper jaw, and in this manner we pronounce the consonants *f* and *v*. The third position is when the tongue is applied to the fore teeth, and thus we pronounce *th*. In the fourth position, we apply the fore part of the tongue to the fore part of the palate, and by this application we pronounce the letters *t*, *d*, *s*, *z*, *r*, *l*, *n*. The fifth position is when the middle part of the tongue is applied to the palate, and thus we pronounce *k*, the hard sound of *g* (as in *ga*), *sh*, *j*, and *ng*.

In the first position we have three letters, of which the most simple, and, indeed, the only articulative one, being absolutely mute, is *p*. In the formation of this letter, nothing is required but the sudden closing of the mouth and stopping the vowel sound. *B*, though justly considered as a mute, is not a perfect mute. The mouth being kept in the same position, and the breath being emitted through the nostrils, the letter *m* is produced. In the first position, therefore, we have a perfect mute *p*, having no audible sound, a labial and liquid consonant *m*, capable of a continued sound, and, between these two extremes, we have the letter *b*, somewhat audible, though different from any vocal sound. In the second position we have the letters *f* and *v*, neither of which is a perfect mute. The letter *f* is formed by having the aspiration not altogether interrupted, but emitted forcibly between the fore teeth and the under lip. This is the simple articulation in this position. If to this we join the guttural sound, we shall have the letter *v*, a letter standing in nearly the same relation to *f*, as *b* and *m*, in the first position, stand to *p*. Thus we have four distinctions of consonants in our alphabet, namely, of perfect and imperfect consonants, perfect and imperfect mutes—*p* being a perfect mute, having no sound ; *b* an imperfect mute, having proper sound, but limited ; *m* a perfect consonant, having sound and continuance ; *f* an imperfect consonant, having no sound audible.

DICTIONARY

OF THE

ENGLISH LANGUAGE

A

A has, in English, four distinct sounds: the long or slender; the short; the open, or Italian; and the broad.

Before a word beginning with a vowel or a silent *h*, it is, for the sake of euphony, changed into *an*, as, *an* owl, *an* heir; and also before a word beginning with *h* sounded, if the accent be not on the first syllable, as, *an* harangue; but it is not so altered before *u* long, or before the word *one* or *once*, in which the *o* is pronounced as if preceded by the consonant *w*.

A has many significations in our old writers and in our provincial dialects, of which the following are some: ah, he, they, all, on, have, one, always, yes, and even. It has also a peculiar signification, denoting proportion, or each, as a hundred *a* year, a pound *a* man. It is also sometimes placed before a participle, as gone *a-hunting*, come *a-begging*, the house is *a-building*.

A, as a prefix to many English words, is equivalent to the preposition *in* or *on*, as in *asleep*, *alive*, *afoot*, *aground*. *A* is also a prefix of Latin and Greek words, and means, when prefixed to Latin words, away from, as *avert*, to turn away from, *vert* meaning to turn; and when prefixed to Greek words, it means not or without, as *atom*, what cannot be divided, *tom* coming from a word meaning to cut.

A in Music is the nominal of the sixth note in the natural diatonic scale, and corresponds to the *la* of Guido. It is also the name of one of the two natural modes; and it is the open note of the second string of the violin produced by 435 vibrations per second, by which the other strings are tuned and regulated.

A1, a-*wun*, in Lloyd's Register, the mark of a wooden ship of the first class, the A referring to the quality of the hull, and the 1 to that of the equipment; first-rate.

AAM, *n. aim*, a liquid measure used in Holland and Germany of about 30-35 gallons. (Dut. *Aam.*)

AARD-VARK, *n. ard*-vark, ant-bear, an African edentate of the genus *Orycteropus*. (Dut. meaning earth-pig.)

AARD-WOLF, *n. ard*-woolf, the African carnivore, *Proteles cristatus*. (Dut. meaning earth-wolf.)

AARONIC, *a.* ayr-*on*-ik, Aaronical.

AARONICAL, *a.* ayr-*on*-ik-al, pertaining to Aaron or his priesthood.

AARONITE, *n. ayr*-on-ite, a descendant of Aaron; a Hebrew priest.

AARON'S-BEARD, *n. ayr*-ons-beerd, the large-flowered St. John's wort, *Hypericum calycinum*.

AARON'S-ROD, *n. ayr*-ons-rod, a rod with a serpent twined round it [Arch.].

AB, a Latin prefix signifying from; away from.

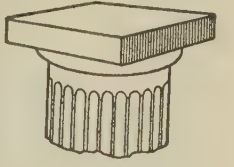
ABACA, *n. ab*-a-ka, Manilla hemp, the fibre of *Musa textilis*.

ABACIST, *n. ab*-a-sist, user of an abacus; an accountant.

ABACK, *ad.* a-*bak*, towards the back: driven back by the wind against the mast [Naut.]. Taken aback, surprised and put out. (A.S. *onbac*, backwards.)

ABACTOR, *n.* a-*bak*-tor, one who steals cattle in herds. (L. *abactum*, driven away.)

ABACUS, *n. ab*-a-kus, an ancient contrivance still used in the nursery and infant schools to teach arithmetic; called also Abacus Pythagoricus; a cupboard or buffet; a table constituting the upper member or crowning of a column and its capital [Arch.]. Abacus harmonicus, the structure and arrangement of the keys of a musical instrument. (L. *abacus*, a square tablet for counting on.)



Abacus.

ABADDON, *n.* a-*bad*-don, the destroying angel; the bottomless pit. (Heb. *abad*, to be lost.)

ABAFT, *ad.* a-*bahft*, at or towards the stern of a ship. (A.S. *beæftan*, behind.)

ABALIENATE, *v.t.* ab-*ay*-le-an-ate, to transfer the title of a property to another. Abalienated. Abalienates. Abalienating. (L. *abalienatum*, alienated.)

ABALIENATION, *n.* ab-*ay*-le-an-*ay*-shon, act of abalienating [Law]; amputated [Med.].

ABALONE, *n.* ab-a-*lo*-ne, a shell known as the sea-ear from which mother-of-pearl is obtained, a species of *Haliotis*.

ABANDON, *v.t.* a-*ban*-don, to desert; to give up. Abandoned. Abandoning. Abandons. (Fr. *abandonner*, to desert.)

ABANDON, *n.* a-*ban*-don, unrestrained impulsiveness: frankness or enthusiasm of manner. (Fr.)

ABANDONED, *a.* a-*ban*-dond, deserted; given up, generally to ruin or vice; extremely profligate.

ABANDONEDLY, *ad.* a-*ban*-dond-le, in an abandoned fashion.

ABANDONEE, *n.* a-ban-don-*ee*, the person to whom anything is abandoned; the underwriter to whom is given the salvage of a sunken vessel [Law].

ABANDONMENT, *n.* a-*ban*-don-ment, the act of abandoning or state of being abandoned.

ABASE, *v.t.* a-*base*, to humble; to degrade. Abased. Abases. Abasing. (O.Fr. *abaissier*, to lower.)

ABASEMENT, *n.* a-*base*-ment, state of being abased.

ABASH, *v.t.* a-*bash*, to put to confusion through shame on being discovered in a guilty or unworthy action or condition. Abashed. Abashes. Abashing. (O.Fr. *esbaiss.*)

ABASHMENT, *n.* a-*bash*-ment, confusion through shame.

ABASK, *a.* a-*bahsk*, basking.

ABATABLE, *a.* a-*bate*-a-bl, that which may be abated.

ABATE, *v.t.* a-*bate*, to deduct; to lessen: *v.i.* to become less; to fail. Abated. Abates. Abating. (Fr. *abattre*, to bring down.)

ABATEMENT, *n.* a-*bate*-ment, the act of abating; sum deducted from an account; a mark of dishonour in a coat of arms [Her.]; overthrow or defeat, as of a writ [Law].

ABATER, *n.* a-*bate*-er, the person or thing that abates.
ABAT-JOUR, *n.* ab-a-*sjoor*, a skylight; something used to throw light downwards. (Fr. *abat-jour*, skylight.)
ABATTIS, *n.* a-*bat*-tis, a temporary work, made of felled trees, with the branches pointing outwards, so as to hamper an attack [Fort.].
ABATTOIR, *n.* a-bat-*wor*, a slaughterhouse. (Fr. *abattoir*.)
ABATURE, *n.* *ab*-a-tewr, the trail; the spoor.
ABAT-VOIX, *n.* a-bah-*vwor*, the sounding-board or canopy over a pulpit. (Fr. *abat-voix*.)
ABB, *n.* the yarn for a weaver's warp. **Abb-wool**, the wool of which it is made.
ABBA, *n.* *ab*-ba, a father; figuratively, an ecclesiastical superior. (Aramaic.)
ABBACY, *n.* *ab*-a-see. the rank and privileges and jurisdiction of an abbot.
ABBATIAL, *a.* ab-*aysh*-al, pertaining to an abbey.
ABBATICAL, *a.* ab-*bat*-ik-al, abbatial.
ABBÉ, *n.* *ab*-bay, an abbot; also an ecclesiastic having no cure; before the French Revolution, a class of persons who had pursued a course of theological study in the hope of obtaining preferment in the Church, many of whom employed themselves as men of letters, or as tutors in families, or professors in universities.
ABBESS, *n.* *ab*-ess, the lady superior of a nunnery. (O.Fr. *abesse*.)
ABBEY, *n.* *ab*-e, a residence of persons, of either sex, secluded from the world, and devoted to a life of celibacy and religion; the church attached to an abbey; the residence of the superior; a mansion once an abbey. (O.Fr. *abeie*.)
ABBOT, *n.* *ab*-ot, originally a father or aged monk, but afterwards the superior of an abbey. **Abbots regular** were abbots in function as well as name; **Abbots commendatory** were guardians of abbeys, drawing part of the revenues. The **Abbot of misrule** or **Abbot of unreason**, in Scotland, was similar to the **Lord of misrule** in England. (A.S. *abbod*.)
ABBOTSHIP, *n.* *ab*-ot-ship, the office of an abbot.
ABBREVIATE, *v.t.* ab-*bre*-ve-ate, to shorten; to abridge. **Abbreviated. Abbreviates. Abbreviating.** (L. *abbreviatum*, abbreviated.)
ABBREVIATION, *n.* ab-*bre*-ve-*ay*-shon, the act of shortening; a letter, or a few letters used for a word, as **Lat.** for Latin, **A.D.** for Anno Domini; the reduction of fractions to their lowest terms [Math.]; one dash or more on the stem of a note, distinguishing it as a quaver, semiquaver, or demisemiquaver [Mus.].
